

DIASPIN

COMPETITOR

► Applications

- Only for processing Dyed & Dope Dyed Fibre Ne20-60 with High Spindle Speed.

► Characteristics

- DIASPIN shows superior wear resistance in processing of Dyed Synthetic fibers.
- The Special Coating Layer formed on the surface will protect the traveller's yarn passage area from fiber friction.
- From the benefit of this protection, yarn imperfection can be drastically minimized which leads to traveller's longer service life over competitor travellers.

► Effects

- Transition data of Yarn Imperfections throughout traveller usage period.
